## Approved germicides:

There are only two approved germicides that may be used when sanitizing “used bedding products”. These two germicides are Sterifab and Microban X580, they both contain a fluorescent tracer. The tracer enables the inspector to detect if a bedding product has been sanitized.

## Requirements for law labels:

1. **Second Hand (Used Article) SANITIZED** (required label for germicidal treatment) label must be at least 12 square inches, made from a non-tear able material (Yellow), stamped or printed in indelible (Black) ink.
2. **All New Material Consisting of:** (required for bedding products made from all new materials) label must be at least 6 square inches, made from a non-tear able material (White), stamped or printed in indelible (Black) ink.
3. **Article contains SECOND-HAND MATERIAL** (required label for renovated bedding products in addition to the sanitized “yellow” label) must be at least 12 square inches, made from a non tear able material (White), stamped or printed in indelible red ink.
4. **Processed Filling Material** is an identification label. The type and material of this label is optional. However the label shall be visible and legible.
